

PRODUCT COMPARISON

IMPACT recovery SYSTEMS™

- High tension spring Mechanism for rebounding to original position.
- High Tensile Strength.
- High Impact System (Withstand for 50 Impacts at 55 mph).
- High Density Polyethylene(HDPE).
- 3m Diamond Grade High Reflected Sheeting.
- Excellent Heat Resistance.
- UV resistant.

OTHER INFERIOR PRODUCTS

- Less Flexible Characteristics.
- Less Tensile Strength.
- Less Impact System (Withstand for 5 Impacts at 55mph).
- Polyurethane(PU) / Polyethylene(PE).
- Low Visibility as Per Standard.
- Low Heat Resistance.
- Not UV resistant.
